CP 0044

		CP 0044
Power	kW	3
Weight	kg	11
Length	mm	680
Air consumption	l/s	40
Revolutions	rpm	4800
Blade	mm	355
Max depth	mm	100
Arbor	mm	25
Air inlet	inch	1/2" NPT
"Vibration level 3 axes (ISO 28927-8)"	m/s <sup>2</sup>	6,6
"Sound power level guaranteed (2000/14/EC)"	dB(A)	112
Part number		T024421

(At 6 bar)  
Not sold within EU

## Applications

Chicago Pneumatic's powerful CP 0044 pneumatic cut-off saw is designed to cut a variety of materials including concrete, asphalt and stone. The pneumatic drive makes it especially suitable for indoor applications where gasoline driven units are difficult or impossible to use.

## General information

The CP 0044 is a very powerful and durable air tool, driven by a direct drive, 4 hp motor. The direct drive eliminates the need to continuously check the drive belt tension.

The saw is engineered for precise balance so less effort is needed to do the job at hand. A built-in oiler provides continuous lubrication, so more time can be spent on the job and less time on servicing.

Safety features on the CP 0044 include a standard lock-off trigger to help prevent accidental starting and a blade guard that can be operated by one hand for convenience.

The CP air driven saw is appreciated because it is powerful and has a very low maintenance cost in relation to gasoline driven saws.

## Key features

- Chicago Pneumatic 4 hp air motor
- Direct drive operation
- Integral oiler
- Lock-off trigger
- One-hand operation blade guard
- Two-position handle
- Well balanced and extremely durable
- 1" (25.4 mm) arbor accepts industry standard blades with diameters 12" (300 mm) and 14" (355 mm)

## Users

Companies performing indoor cutting tasks in concrete, asphalt, stone, etc.

Foundries and other worksites where the use of gasoline powered saws is restricted.

General contractor companies.

High-performance products. Designed for you!
