

Chicago Pneumatic

Scabblers are ideal for cleaning and roughening of concrete and also for keying the surface of construction joints. They can also be used to produce ornamental or contrasting finishes on concrete surfaces.

(At 6 bar)

¹⁾ Important: Full details of measurement are available in the Safety and Operating Instructions of the product (part no 9800 0611 90). It can be found on www.cprintshop.com

²⁾ 1/2" NPTF also included in delivery

General information

These are lightweight and compact tools, equipped with tungsten-carbide tipped pistons. The pistons oscillate inside the head or cylinder of the scabblers and strike the surface of the material being worked on. All the scabblers have three pistons mounted in line.

The cycling of the pistons occurs due to the air porting arrangements in the piston assembly. The machines are examples of a valveless piston motor.

Key features

- High power
- High productivity
- Easy to maintain
- Durable
- Back head grip, gives in-line thrust
- Chamfered cylinder block increases visibility to the work surface
- Tungsten-carbide tipped pistons last longer

CP 0006 SVR

This is a lightweight, well balanced tool built with extra vibro-reducing features. It combines good productivity with very good control of the work.

The special vibro-reducing front handle has ample room for a gloved hand and reduces the operator's exposure to vibrations.

CP 0006

The easy to use standard tool provides good productivity and durability. It is ideal for work on large surfaces.

CP 0006 and CP 0006 SVR have many parts in common. Other common things are the good productivity and the excellent control of the work.

CP 0066

A short, compact tool which allows work in confined spaces.

Users

- Builders and contractors
- Quarries and stone masons
- Municipalities
